

A PROGRAMME TO LEARN HOW TO PROGRAM.

Presenting NIIT's course for **Programming in Java.**

Java is the most popular programming language for Android smartphone applications as well as for developing new-age technology like the Internet of Things. Knowledge of this language ensures a big boost to your career, right from the start. Choose NIIT and upgrade your skills for today's world. And, what's more? This programme is also available on NIIT Digital, our very own Online Learning Platform.

Who can apply?

This specially created programme is open to all those who are familiar with the Windows environment and wish to get familiarized with Java programming.

How does it help?

This is the most comprehensive and reliable course for those who want to learn Java and advance their journey in the field of software development. After successfully completing this course, students will be able to develop applications like, 'A file downloader Application' or 'Create login/signup module for an application', which will provide them with an edge over others.

How does NIIT give you an edge?

- Programme mapped with Oracle exam 1Z0-803: Java SE 7 Programmer
- 54 hours of training
- More than 14,000 learners trained
- Faculty with industry experience
- India's most trusted training brand
- 35 million learners worldwide
