NIIT

Java is the most popular programming language for Android smartphone applications as well as for developing new-age technology like the Internet of Things. Knowledge of this language ensures a big boost to your career, right from the start.
Choose NIIT and upgrade your skills for today's world.

Who can apply?

This specially created programme is open to all those who are familiar with the Windows environment and wish to get familiarised with Java programming.

How does it help?

This is the most comprehensive and reliable programme for those who want to learn Java and advance their journey in the field of software development. After successfully completing this programme, students will be able to develop applications, like a file downloader or create login/signup modules for such applications, giving them an edge over others.

What will you learn?

Create object-oriented Java applications

Implement operators

Work with conditional and loop constructs

Work with arrays, enums and strings

Implement inheritance and polymorphism

Handle errors
